The day after Halloween, November 1, was known as "All-hallows." On this day people went to church to remember the great people who died for their religion. The night before "All-hallows" was called "All-hallows' Eve." The name later became "Halloween."

John Keats is one of the greatest English poets. He was born in London in 1795 and started studying to be a doctor when he was only fifteen. But after he finished his studies, he gave up the idea of becoming a doctor and decided to be a poet. He wrote and soon became an important poet.

Keats spent the last three years of his life writing a lot of beautiful poems. But he did not have a happy life at that time. During the past one hundred years, there have been many inventions that make our life much easier and more interesting. TV is one of them. Many people enjoy watching TV for fun. Some even believe that TV has made their children smarter because there are all kinds of information on it---news, science, sports, music, and language. Children can learn a lot from TV in a short time without going out. Many parents are happy about this because they themselves are too busy to spend time with their children.

But we have found that more and more children today have problems with reading, thinking, and concentrating even though they have watched a lot of TV. In fact, getting much information from TV does not mean real learning. Children who watch too much TV do not have enough time to think or to communicate with people. Besides, it takes time and love for children to grow up. What children need most is their parents. Parents give children love, and help them solve problems in the right way. We should teach our children what real life is without TV. After all, machines should not be more important than people.
